DISE at District level

Release 2010 a journey towards achievement

The diagram illustrates a data flow process. It starts with a mobile phone labeled 'Jen phone' connected to a 'Quote Server'. Below this is a 'NOJAM' box containing a 'Forward Sheet'. Further down, a 'Quality Required' box is connected to a 'Server' box, which in turn is connected to a 'Database' box. A note at the bottom left states 'This can link to a variety of databases'. A 'Phone Bank Data Link' is also shown at the bottom right.
