Memo No. 2/33-ICT-2014/Smart Sch/20183631
Dated: 12/03/18

Sub: Optimal utilization of the infrastructure created in the schools of Smart Classrooms.

1.0 The Department has set up infrastructure in your school in the form of Smart Classrooms. However, during the field inspections, it has come to the notice that this infrastructure is not being optimally utilized. At some of the places, room is locked and only the teachers use the classroom either for having discussion among themselves or as staff room. These classrooms were however not supposed to be the staff room or the libraries rather the same need to be utilized as learning centres for students.

2.0 School heads are therefore requested to ensure that these classrooms are optimally utilized only by students. School heads are however given liberty to choose classes and the subjects for which these labs are to be utilized. The respective subject teachers also need to be advised to ensure that they prepare the electronic content and use the infrastructure effectively.
